FOREWORD

The Bureau of Statistics was asked to assist the Department of Education in the design of a standardized enrollment form and corresponding data entry system for collecting pertinent demographic information on Yukon students. One of the products of this project was the creation of a student demographic profile.

The student profile portrays a demographic picture as of December 1987. The total Yukon enrollment was 4,925 students, 2,572 male and 2,353 female, which follows quite closely to the YHC population numbers. It also follows the enrollment figures shown in the Education annual report very closely.

This was the first time a virtual census of students in the Yukon has been done. The experience with the first registration will ensure more comprehensive coverage for all information in the future.
